QUESTION 1

An ArcGIS user maintains a street signpost database with measure in terms of two route feature classes: distance from the nearest school and distance along the street.

If the two feature classes are created from the same source line feature class, which geoprocessing tool will support calculating one event from the other?

- A. Transform Route Events tool
- B. Overlay Route Events Tool
- C. Locate Feature along Routes tool
- D. Near tool

Correct Answer: A

QUESTION 2

Given an elevation surface, a raster of forest stands, and a point feature class of saw mills, which analysis is used to determine the optimal route from each forest stand to the nearest saw mill?

- A. Network
- B. Viewing
- C. Proximity
- D. Distance

Correct Answer: D

QUESTION 3

A tax preparation company completes a quarterly cleaning of their records. Using a Python script they automate the deletion of records that are more than seven years old or records for customers who have not been seen in more than five years.

When using a cursor function, what deletes the appropriate records?

- A. a search cursor and the deleteRow method
- B. an insert cursor and the deleteRow method
- C. an update cursor and the deleteRow method
- D. a find cursor and the deleteRow method

Correct Answer: C

QUESTION 4

An ArcGIS user is making a small-scale map using road data that was collected at a large scale. What is the appropriate tool for removing some of the road detail?

- A. Thin Road Network
- B. Simplify Line
- C. Collapse Dual Lines to Centerline
- D. Smooth Line

Correct Answer: B

QUESTION 5

An ArcGIS user downloads shapefiles from a Web site. The metadata on the Web site indicates that the spatial reference is the same as that used in the user's workplace, but the downloaded data appears too small.

What is the most likely cause of the alignment problem?

- A. The metadata refers to an incorrect datum
- B. The linear units referred to in the metadata are incorrect
- C. The central meridian from the metadata is incorrect
- D. The latitude of origin from the metadata is incorrect

Correct Answer: B
