QUESTION 1

When examining requirements relationships, the business analyst (BA) ensures the relationships satisfy the following quality criteria:

- A. testable.
- B. independent.
- C. measurable.
- D. unambiguous.

Correct Answer: D

QUESTION 2

Which approach aligns to approval of requirements at the end of a phase?

- A. Adaptive
- B. Modelling
- C. Predictive
- D. Prioritization

Correct Answer: C

Approval of requirements and designs may be formal or informal. Predictive approaches typically perform approvals at the end of the phase or during planned change control meetings.

QUESTION 3

To ensure that "all requirements and designs align to business requirements" is the purpose of which task?

- A. Conduct elicitation
- B. Verify requirements
- C. Validate requirements
- D. Assess risks

Correct Answer: C

QUESTION 4

Requirements allocation is an element of which task?

- A. Specify and model requirements
- B. Verify requirements
- C. Define requirements architecture
- D. Define design options

Correct Answer: D

The purpose of Define Design Options is to define the solution approach, identify opportunities to improve the business, allocate requirements across solution components, and represent design options that achieve the desired future state. Requirements allocation is the process of assigning requirements to solution components and releases to best achieve the objectives.

QUESTION 5

Which activity is a business analyst (BA) performing when ensuring that a set of requirements is developed with enough detail to be usable by a particular stakeholder?

- A. Validating requirements
- B. Verifying requirements
- C. Eliciting requirements
- D. Specifying requirements

Correct Answer: B

Verify Requirements: ensures that a set of requirements or designs has been developed in enough detail to be usable by a particular stakeholder,
