QUESTION 1

An administrator adds a new special table to an enterprise geodatabase using database tools. A user wants to implement topology rules on the special table to determine if polygon overlap.

What does the user have to verify?

- A. The data is registered with the geodatabase.
- B. The data is registered as versioned with the move edits to base option.
- C. The data has attribute indexes.
- D. The data is a stand-alone feature class.

Correct Answer: B

QUESTION 2

A GIS assistant is creating a new one-way, parent-to-child replica

There are 10 feature classes added to ArcMap, and the Create Replica wizard completes successfully.

However only 8 feature classes were replicated to the child geodatabase.

What should the GIS assistant confirm in the 2 missing feature classes before calling Esri Support?

- A. The All Features option was used in the Create Replica wizard.
- B. The map document was NOT zoomed in to exclude the 2 feature classes.
- C. The feature classes are registered as versioned and have Global IDs.
- D. The connection between the parent and child is stable.

Correct Answer: C

QUESTION 3

Which reconcile option should be selected to detect all no level conflicts?

- A. By object
- B. By attribute
- C. By root
- D. By class

Correct Answer: B

QUESTION 4

A database administrator wants to enable goedatabase functionality on the current production database. Another user will be in charge of goedatabase administrator but the user does NOT currently exist in the database.

Which tool can the database administrator use?

- A. Enable Enterprise Goedatabase
- B. Register with Goedatabase
- C. Create Enterprise Goedatabase
- D. Import Goedatabase Configuration keyword

Correct Answer: D

QUESTION 5

A company needs to use on-way replication to synchronization edits from its child geodatabase to its read-only parent geodatabase. Only one editor will be responsible for editing the child geodatabase.

Which option should company use for the child?

- A. Personal geodatabase
- B. File geodatabase
- C. Desktop geodatabase
- D. ArcGIS Data Store

Correct Answer: A
