## QUESTION 1

Create a role called sample-apache in /home/sandy/ansible/roles that enables and starts httpd, enables and starts the firewall and allows the webserver service. Create a template called index.html.j2 which creates and serves a message from /var/www/html/index.html Whenever the content of the file changes, restart the webserver service.

Welcome to [FQDN] on [IP]

Replace the FQDN with the fully qualified domain name and IP with their address of the node using ansible facts. Lastly, create a playbook in /home/sandy/ansible/ called apache.yml and use the role to serve the index file on webserver hosts.

Correct Answer:

See the for complete Solution below. /home/sandy/ansible/apache.yml

```
---
- name: http
  hosts: webserver
  roles:
    - sample-apache
```

/home/sandy/ansible/roles/sample-apache/tasks/main.yml

```
---
# tasks file for sample-apache
- name: enable httpd
  service:
    name: httpd
    state: started
    enabled: true
- name: enable firewall
  service:
    name: firewalld
    state: started
    enabled: true
- name: firewall http service
  firewalld:
    service: http
    state: enabled
    permanent: yes
    immediate: yes
- name: index
  template:
    src: templates/index.html.j2
    dest: /var/www/html/index.html
```

```
src: templates/index.html.j2
dest: /var/www/html/index.html
notify:
  - restart
```

/home/sandy/ansible/roles/sample-apache/templates/index.html.j2

```
Welcome to {{ansible_fqdn}} {{ansible_default_ipv4.address}}
```

In /home/sandy/ansible/roles/sample-apache/handlers/main.yml

```
- name: restart
  service:
    name: httpd
    state: restarted
```

## QUESTION 2

Which command ships with Ansible and provides module documentation on your system?

- A. ansible-documentation
- B. ansible-help
- C. ansible-doc
- D. ansible-module-doc

Correct Answer: C

The ansible-doc command provides documentation on ansible modules.

## QUESTION 3

What keyword sets a change condition for a given task?

- A. flag\_change

- B. changed\_when
- C. register\_change
- D. change\_set

Correct Answer: C

---

#### QUESTION 4

What are the minimum configurations that must be made to install Ansible Tower?

- A. You must provide a target host and set some key user passwords.
- B. You must generate an SSL certificate for the Ansible Tower web frontend.
- C. You must specify a few key user passwords.
- D. PROJECTS\_ROOT must be configured.

Correct Answer: D

This is the only required configuration change needed prior to installation.

---

#### QUESTION 5

Is it possible to specify multiple inventory files at once?

- A. Yes, you specify your inventory as a directory containing valid inventory files.
- B. No.
- C. Yes, you must provide extra parameters to the -i flag.
- D. Yes, you must specify a reference inventory master file.

Correct Answer: A
