QUESTION 1

Under Regulation T of the Federal Reserve, when may a broker overlook an amount due in a customer's account?

- A. if it does not exceed \$1,000
- B. if the client makes a request in writing
- C. if the value of a trade is less than \$1,000
- D. under no circumstances

Correct Answer: A

if it does not exceed \$1,000. If the net amount due is less than \$1,000 no action is required under Reg T.

QUESTION 2

Which of the following securities is traded only in the over-the-counter market?

- A. corporate bonds
- B. preferred stocks
- C. open-end investment companies
- D. closed-end investment companies

Correct Answer: C

open-end investment companies. Open-end mutual funds are a continuous offering of new securities that are not traded on an exchange. They trade only in the over-the-counter market. The other choices may trade over-the-counter or on exchanges.

QUESTION 3

The term "secondary market" refers to:

- A. trading in issues of low quality
- B. trading in outstanding issues
- C. issues that banks are not permitted to underwrite
- D. private placements

Correct Answer: B

trading in outstanding issues. Secondary market transactions involve trading in securities after the original issue is made. When an issuer offers new securities to the public it is a "primary offering".

QUESTION 4

A mutual fund with an 8% load and a 1% redemption fee carries a current quote of \$6.25 - \$6.79. If an investor has tendered his shares for redemption on that basis, the per share price he will receive is approximately:

- A. \$6.79
- B. \$6.72
- C. \$6.25
- D. \$6.19

Correct Answer: D

\$6.19. The fund has a redemption fee of 1%. This is about 6 cents based upon the bid price. Subtracting that from the \$6.25 bid results in \$6.19.

QUESTION 5

Which of the following securities has the highest amount of market risk?

- A. US treasury bills
- B. US treasury certificates
- C. US treasury notes
- D. savings bank deposits

Correct Answer: C

US treasury notes. Savings bank deposits have no risk. The short duration of treasury bills and certificates embodies less market risk than longer-term treasury notes.
