Correct Answer: C

QUESTION 3

In the figure above, h is the height of triangle ABC from vertex B to base AC. What is the value of h ?

A. see the explanation

Correct Answer: A

Answer:

QUESTION 4

Birds that prey on sage grouse generally hunt by circling over sagebrush and pouncing on sage grouse that come out into the open. Where there are power lines, however, these predators often survey the ground while sitting on the power lines. Although the area they can survey is smaller, predators sitting on power lines are more likely to catch sage grouse than are predators circling in the air. because _____,

The primary purpose of the passage is to

- A. explain why certain scientists rejected a particular hypothesis
- B. show how a conventional theory was weakened by a new discovery
- C. discuss a shift in an approach to explaining a natural phenomenon
- D. account for the widespread influence of a scientific theory
- E. trace the origins of a scientific dispute

Correct Answer: B

QUESTION 5

The essays in this collection, which explore the adaptation of literary texts to film, all (i) _____ the view that the fidelity of film adaptations to their literary precursors is (ii) _____. In fact, the authors of these essays broadly concur that an emphasis on fidelity in film adaptations can be traced to an outmoded academic ideology that insistently prizes the literary in a way that (iii) _____ the value of the cinematic.
