### QUESTION 1

Which of the following statements are CORRECT about the recording server functions in the eSpace Audio Recorder solution? (Multiple Choice)

- A. Receive RTP/SRTP streams from conference sites.
- B. Analyze recording information based on the requests sent by the SIP Server for enabling or disabling conference recording, and generate recording files and data;
- C. Store the recording server parameter settings and recording data;
- D. Support number registration and call connection.

Correct Answer: AB

---

### QUESTION 2

About two-node cluster backup of servers such as the BMU/ eServer, AppAgent, and DB, which of the following statements are CORRECT? (Multiple Choice)

- A. The two-node cluster works in active-active mode.
- B. Only the Linux platform is supported.
- C. Services are interrupted during an active/standby switchover.
- D. After an active/standby switchover the standby node becomes the active one. When the original active node recovers, services are switched back to the original active node.

Correct Answer: BC

---

### QUESTION 3

Which of the following statements is INCORRECT about toll fraud in an enterprise?

- A. User A illegally registers with unified gateway B and directly calls external user D. During the process, user A does not need to pay any fees, which results in toll fraud.
- B. External user B dials the VU of the enterprise (enterprise where unified gateway A is located). When hearing a voice announcement or two-stage dialing tone, user B can directly make national toll calls. In this case, user B pays only local call fees. The international toll call fees, however, must be paid by the enterprise, which forms toll fraud.
- C. External user C dials the trunk prefix from unified gateway A to unified gateway B, toll call prefix on unified gateway B, and toll call number to make an outgoing call.
- D. User D in the enterprise makes international toll calls in non-working hours.

Correct Answer: D

---

**QUESTION 4**

In the eSpace Audio Recorder solution, when installing HWLogIMP, you need to enter the external virtual IP address and port number of the cluster where HWLogIMP resides in the address box of a web browser. The default port number is ().

- A. 8443
- B. 18443
- C. 8001
- D. 8550

Correct Answer: C

---

**QUESTION 5**

About the multimedia conference configuration, which of the following statements are CORRECT? (Multiple Choice)

- A. Huawei multimedia conference core components must include the Meeting MS, unified gateway, and BMU.
- B. The conference server information does not need to be configured on the BMU.
- C. A SIP trunk destined for the Meeting MS must be configured on the unified gateway.
- D. The instant conference service rights must be assigned to a UC account to support the multimedia conference service.

Correct Answer: ACD
