Correct Answer: BCD

---

#### QUESTION 3

WDS technology increases the flexibility and convenience of the entire network structure, but only supports peer-to-peer mode of operation.

- A. True
- B. False

Correct Answer: B

---

#### QUESTION 4

The following description of the PSK certification is incorrect.

- A. PSK authentication requires the same pre-shared key to be configured on the wireless client and device side.
- B. WPA and WPA2 support PSK certification
- C. PSK authentication process is similar to the shared key authentication process, so the security is the same.

---

D. PSK authentication is to verify the legitimacy of the STA side key through 4-way handshake key negotiation.

Correct Answer: A

---

#### QUESTION 5

For the networking architecture of the AC+thin AP, the following description is wrong.

- A. AP can't work alone, it needs to be maintained and managed by AC centralized agent.
- B. It can enhance service QoS, security and other functions through AC.
- C. The AP itself has zero configuration and is suitable for large-scale networking.
- D. Management of APs and users must be implemented through the network management system

Correct Answer: D
