-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Which of the following options are the design principles for WLAN outdoor sites?

- A. In the wireless relay application scenario, as long as the line of sight is reachable between the stations
- B. Avoid interference from strong electric and other signals near the site
- C. Site needs to have reliable power
- D. The higher the location of the site, the better.

Correct Answer: BC

QUESTION 2

The following APs for indoor placement scenarios have (A), APs with indoor distribution scenarios have (B), and APs with outdoor coverage/bridge backhaul scenarios have (C)?

- A. AP 6010DN
- B. AP 7110DN
- C. AP 6310SN
- D. AP 6510DN

Correct Answer: D

QUESTION 3

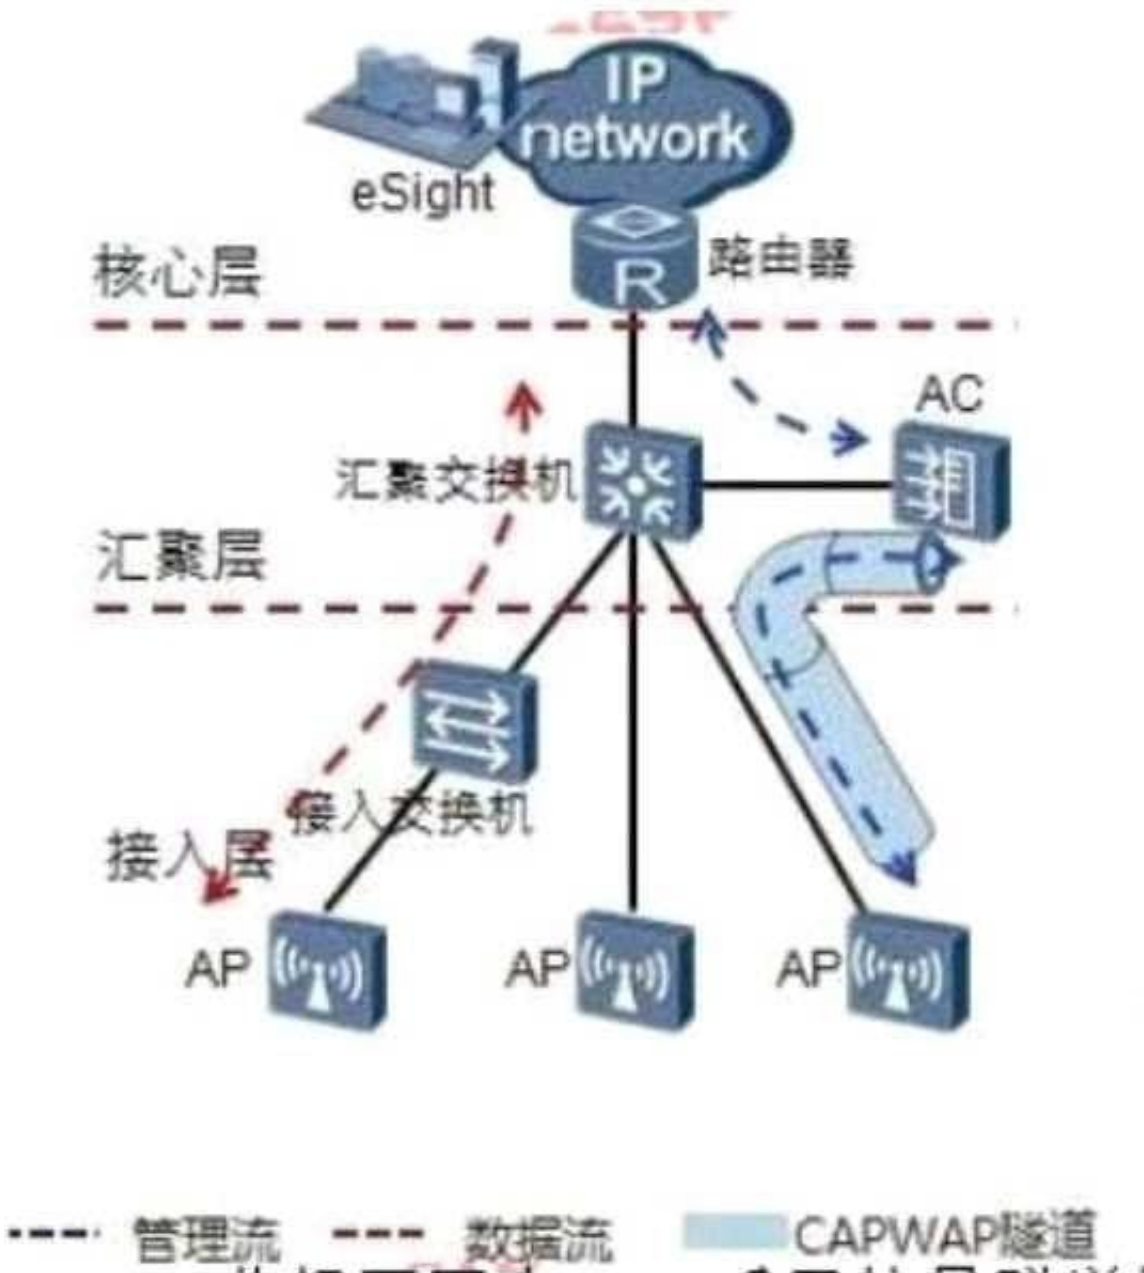

In the antenna angle alignment aid, how many progress bars will become red when the RSSI exceeds, indicating that the signal is too strong?

- A. 55
- B. 60
- C. 65
- D. 70

Correct Answer: C

QUESTION 4

The following figure is a typical WLAN networking diagram. Which of the following is correct about this figure?

- A. In the network diagram, the AP uses the tunnel forwarding mode. In the tunnel forwarding mode, the wireless user service data is also encapsulated in the CAPWAP tunnel. The intermediate port is forwarded between the AP and the AC. The port number of the tunnel is UDP 5246.
- B. There are two types of tunnels for tunnel forwarding: control tunnels and service tunnels. Signal packets are controlled by tunnels and data packets are taken from service tunnels.
- C. The management data of the AP in the tunnel forwarding mode must be encapsulated in the tunnel of the CAPWAP protocol, and the data traffic of the AP can be encapsulated in In a CAPWAP tunnel, it may not be encapsulated in a CAPWAP tunnel.
- D. The advantage of tunnel forwarding is that the data flow and the management flow all pass through the AC, which makes it easier to implement security control policies for wireless users.

Correct Answer: BD

QUESTION 5

What type of radio frame is used when the AP performs a counteraction against an illegal terminal?

- A. Beacon frame
- B. Disassociation frame
- C. Deauthentication frame
- D. Probe frame

Correct Answer: C
