

# H13-341<sup>Q&As</sup>

Huawei Certified internetwork Expert - Transmission

## Pass Huawei H13-341 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.geekcert.com/h13-341.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

Which of the following ROADM boards have WSS optical modules? (Choose two.)

- A. RDU9
- B. WSM9
- C. WSMD9
- D. WSD9

Correct Answer: BD

---

### QUESTION 2

Which of the following statements about the line fiber quality monitoring performance parameters is wrong?

- A. The pulse width of emitted optical pulses varies according to monitoring modes, and affects the detection distance and measurement precision. A greater pulse width provides a larger dynamic range, longer detection distance and better measurement precision.
- B. When the pulse width increases, the light emitting time increases and consequently a larger energy is obtained. This means that a larger dynamic range can be acquired but also larger dead zones will result.
- C. Measurement is performed multiple times within the detection time. The average value is obtained based on the measurement result to improve the measurement precision. The actual duration from the time when a detection event starts to the time when the detection results are returned will be longer than the Detection time.
- D. The total fiber loss will affect the detection distance and dynamic range is fixed for the same detection mode. Therefore, a larger total fiber loss indicates a smaller detection distance.

Correct Answer: A

---

### QUESTION 3

Which of the following statements about the modulation technologies of the 40Gbit/s and 100Gbit/s coherent systems are correct?

- A. The modulation technology used in a 100G coherent system is ePDM-QPSK.
- B. The modulation technology used in a 40G coherent system is ePDM-BPSK.
- C. The modulation technology used in a 40G coherent system is ePDM-QPSK.
- D. The modulation technology used in a 100G coherent system is ePDM-BPSK.

Correct Answer: A

---

#### QUESTION 4

Which of the following residual dispersion values are within the dispersion tolerance of the TN52ND2 board?

- A. 900ps/nm
- B. 500ps/nm
- C. 700ps/nm
- D. 600ps/nm

Correct Answer: C

---

#### QUESTION 5

Which of the following protection schemes require the APS protocol?

- A. ODUk SPRing protection
- B. ODUk SNCP
- C. SW SNCP
- D. 1:1 optical line protection

Correct Answer: A
