QUESTION 1

In FusionAccess R6, what is the correct statement about infrastructure virtual machines?

- A. It is recommended to set the CPU reservation for the ITA virtual machine, and it does not need to be set during deployment in a production environment
- B. When deploying FusionAccess management components, vAG/vLB and WI can be deployed in the same virtual machine
- C. It is recommended to use Windows2012 for AD/DNS/DHCP components, and Windows2008 can also be used in actual installation
- D. Redhat operating system is recommended for linux infrastructure virtual machines

Correct Answer: C

QUESTION 2

When creating a virtual machine on the ITA Portal interface, if the progress of the creation is stuck on checking whether the virtual machine IP address is reachable.

Which ones? (Multiple choice)

- A. The IP address of the virtual machine obtained from DHCP and the IP address of the ITA are not in the same network segment
- B. The virtual machine does not get an IP address
- C. The network between the virtual machine and the DHCP server is unreachable
- D. The template used to create the virtual machine uses a static and manually assigned IP address

Correct Answer: BC

QUESTION 3

Huawei's computing virtualization technology, memory QoS function includes which of the following features ():

- A. Memory reservation
- B. Memory share

Correct Answer: B

QUESTION 4

In Huawei virtualization, what is the correct statement about virtual machine live migration (multiple choice)

- A. Ordinary users are not aware of the process of virtual machine hot migration
- B. Only virtual machines running on virtualized storage can be live migrated
- C. Virtual machine hot migration uses memory alternative migration technology
- D. Virtual machine hot migration uses memory compression technology to improve migration efficiency

Correct Answer: ACD

QUESTION 5

When ManageOne ServiceCenter is deployed on the FusionSphere OpenStack virtualization environment, which of the following is the statement correct?

- A. ServiceCenter active/standby deployment needs to specify the external-api network segment floating IP; there is no need to specify the external-om network Duan Fu Moving IP;
- B. ServiceCenter active/standby deployment needs to specify external-api and external-om network segment floating IP;
- C. ServiceCenter active/standby deployment needs to specify the external-om network segment floating IP; there is no need to specify the external-api network Duan Fu Moving IP;
- D. ServiceCenter active/standby deployment does not need to specify external-api and external-om network segment floating IP;

Correct Answer: B
