- A. Management network
- B. Tenant network
- C. Cluster storage network
- D. Back-end storage network

Correct Answer: C

QUESTION 4

Which of the following are the APIs supported by HDFS Plugin? (Choose all that apply.)

- A. Shell API

B. API

C. HTTP REST API

D. Java API

Correct Answer: AB

QUESTION 5

Which of the following statements about the CIFS sharing configuration of Huawei OceanStor 9000 is false?

A. If Enable notify is selected, the changes made by a client to a directory cannot be detected by other clients that are accessing the directory or its parent directory.

B. If Enable Oplock is selected, files are locally cached before being sent to the shared, improving clients\\' access efficiency.

C. If Enable guest is selected, users can access shared directories on clients without entering a user name and password.

D. If Signature enforcement is selected, clients are required to enable the signature function. If a client does not enable the signature function, the OceanStor 9000 rejects the data access requests initiated by that client.

Correct Answer: A
