#### QUESTION 1

Two SNCP rings are intersected. Which of the following statements is true about inter-ring service configuration?

- A. Configure one unidirectional SNCP service pair on each intersecting node.
- B. Configure two unidirectional SNCP service pairs on each intersecting node.
- C. Configure four unidirectional SNCP service pairs on each intersecting node.
- D. Do not configure any SNCP protection group on each intersecting node.

Correct Answer: C

---

#### QUESTION 2

When measured rate is smaller than or equal to throughput, frame forwarding latency can be classified by data type into store-and-forward latency and what?

- A. Cut-through latency
- B. Bit processing delay
- C. Bit transmission delay

Correct Answer: A

---

#### QUESTION 3

You can change the VC-12 numbering policy by configuring related parameters on the U2000.

- A. TRUE
- B. FALSE

Correct Answer: B

---

#### QUESTION 4

Alarm suppression applies to intra-board alarms. When alarms of different severity levels are generated, the alarm of a higher severity level suppress the alarm of a lower severity level.

- A. TRUE
- B. FALSE

Correct Answer: B

---

#### QUESTION 5

Besides input and output electrical specifications, the maximum transmission distance of various types of cables also has relevant ITU-T recommendations. 75-ohm and 120-ohm coaxial E1 trunk cables have the same transmission distance.

- A. TRUE
- B. FALSE

Correct Answer: B
