QUESTION 1

Which of the following is not an IaaS service characteristic?

- A. Users can obtain the IaaS service for free.
- B. The services that users obtain are IT resource services.
- C. Users obtain the IaaS services on the Internet.
- D. Users can obtain the IaaS services using the self-service.

Correct Answer: A

QUESTION 2

Which of the following is incorrect about the event status management tool?

- A. Active and passive monitoring
- B. Dashboard and report
- C. Management upgrade
- D. Management console

Correct Answer: C

QUESTION 3

Which of the following statements about FusionCompute cluster management is incorrect?

- A. The computing resource scheduling automation technology can determine whether to migrate a VM based on the CPU usage, memory usage, or both the CPU and memory usage.
- B. In power management, hosts can be powered on or powered off manually or automatically.
- C. The VM migration rules include the keep-VMs-together, mutually-exclusive-VM, and the VM-to-host-group rules.
- D. The IMC policy supports only live migration of Intel CPU series. CPUs from other vendors can be configured with this policy.

Correct Answer: D

QUESTION 4

To create a FusionCompute user used to interconnect with FusionSphere OpenStack, which of the following user types is appropriate?

- A. Domain user
- B. Interface interconnection user
- C. Local user
- D. Third-party user

Correct Answer: B

QUESTION 5

Which of the following VM migration issue complicates security auditing?

- A. Different types of data may be mixed in the same physical machine.
- B. After a VM is transferred from a physical server to another one, no alarms or traces for auditing are generated.
- C. Performance is reduced.
- D. The customer's VMs are hardened.

Correct Answer: B
