QUESTION 1

After the recovery policy of Huawei DR software BCManager-eReplication is deployed, you must perform the test until the test is passed. In this case, failover or planned migration can be implemented.

- A. True
- B. False

Correct Answer: A

QUESTION 2

Which of the following statements about the open protocol of the NDMP for network backup is independent of the platform data storage?

- A. The NAS device that supports the NDMP protocol can directly communicate with the backup server without installing the backup software client on the NAS device.
- B. When the NDMP protocol is used, the backup software, NAS devices, backup media, and production servers must support the NDMP protocol.
- C. During the backup, the NAS device transfers files and directories related to the backup media to the backup server. The backup server prepares indexes for maintenance.
- D. Backup data can be read from NAS storage devices and backed up to backup media instead of production servers. This reduces the workload on production servers.
