QUESTION 1

A customer asks you to deploy a HCP. They want to have three HCP tenants for three Active Directory organization units and two HCP tenants for two UNIX groups. They plan to use Active Directory authentication for CIFS users and UNIX authentication for NFS users. What do you tell the customer?

- A. You can configure CIFS and NFS in accordance to the plan.
- B. CIFS and NFS cannot be configured for tenants.
- C. You can configure for either CIFS or NFS, but not both.
- D. RADIUS servers are required before you can configure CIFS and NFS in accordance to the plan.

Correct Answer: B

QUESTION 2

A company\\'s finance and legal departments do not share any data and should not be able to

access each other\\'s data; The legal department only accesses data using an application that is integrated with HCP using REST. The finance department requires users to be able to browse data using Windows Explorer. What do you tell the customer?

- A. The finance department should be setup as the default namespace and the legal department should have their own namespace.
- B. The finance and legal departments should use the default namespace.
- C. The finance department should have their own namespace and the legal department should use the default namespace.
- D. The finance and legal departments should use different directories in a single namespace.

Correct Answer: A

QUESTION 3

You have performed an upgrade on a customer\\'s HCP. You complete the upgrade and verify that all the nodes are online and then give the system back to the customer. A few minutes later, the customer complains that they can read existing content but they cannot create new content on the HCP. Which step was missed?

- A. The install user password was changed.
- B. The upgrade was not committed.
- C. The rollback was not performed.
- D. The system management console is disabled.

Correct Answer: B

QUESTION 4

During installation, you configured the NTP option as internal. Post installation, the customer instructs you to configure the NTP option with external servers. The HCP internal clock is currently more than 20 minutes out of sync with the current time. What will happen when you configure NTP with external servers?

- A. The next time the HCP is restarted, the current time will be changed.
- B. The current time will be set then HCP will restart.
- C. The current time will be set and HCP will not restart.
- D. Any search nodes in the HCP will re-index all their data;

Correct Answer: B

QUESTION 5

When a replication link is failed over, what happens to the tenants and directories on the replica HCP?

- A. They are marked online.
- B. They become read-only.
- C. They become read/write.
- D. They are marked offline.

Correct Answer: C
