QUESTION 1

A customer is purchasing a HCP configuration to support 400,000,000 objects. Search is not required. What is the minimum required configuration for this customer?

- A. HCP 300 with 4 storage nodes
- B. HCP 500 with 1 storage node
- C. HCP 300 with 40 storage nodes
- D. HCP 500 with 10 storage nodes

Correct Answer: A

QUESTION 2

A customer will be removing old Windows file servers and moving existing data to the default namespace on their new HCP 500. Which protocol is recommended to accomplish the move?

- A. CIFS
- B. HTTP
- C. REST
- D. NFS

Correct Answer: A

QUESTION 3

A customer has an existing HDS archiving solution and has added a new HCP 4.x platform at a remote location. They have taken the replication option as part of the solution. However, attempts to get replication working between the two systems fails. What is the reason?

- A. The distance between the two archive platforms is too far for replication.
- B. The two archive platforms are not configured with matching nodes and disks.
- C. The two replicated platforms are not running identical versions of software.
- D. The original archive platform is running a version of software prior to 3.x.

Correct Answer: D

QUESTION 4

You are configuring a HCP 500 solution with AMS 2100 storage. You choose to configure the storage devices first in the

list of tasks associated with this process. What is the reason for sequencing the tasks in this way?

- A. The HCP software must first be installed on the AMS 2100 for access.
- B. Formatting the storage containers will take a considerable amount of time.
- C. You must have the data LUNs established before you can install the core OS.
- D. The HCP command LUN must be established on the AMS 2100.

Correct Answer: B

QUESTION 5

A customer wants to integrate a HCP into their Windows Active Directory environment. They want to use Active Directory for authentication of 27 users. Which two actions should be performed by the customer? (Choose two.)

- A. Upload a username mapping file to the HCP with associations for the required users.
- B. Create 27 users in the HCP with usernames identical to those used in the Active Directory.
- C. Configure the HCP to use Active Directory authentication.
- D. Create a security group in Active Directory then add the names of 27 desired users.

Correct Answer: AC
