QUESTION 1

At the system management and search console level, which three actions can be performed by the administrator role? (Choose three.)

- A. View tenant list.
- B. Modify tenants.
- C. Remove a node from the HCP system.
- D. Commit a HCP system upgrade.
- E. Modify network security settings.

Correct Answer: ABE

QUESTION 2

Which three tenant management console permissions does the security role have on a HCP? (Choose three.)

- A. View namespace access protocol configurations.
- B. View tenant log messages about security events.
- C. View tenant overview.
- D. Monitor replication.
- E. Modify tenant management console security settings (HCP tenants only).

Correct Answer: BCE

QUESTION 3

In which two instances would the MEGARaid utility be used? (Choose two.)

- A. when replacing multiple failed disks in a HCP 500 node
- B. when replacing multiple failed disks in a HCP 300 node
- C. when replacing an entire node in a HCP 300 in which the RAID group is not healthy
- D. when replacing an entire node in a HCP 500 in which the RAID group is not healthy

Correct Answer: BC

QUESTION 4

A 4-Node HCP with 40 users is being managed using the single administrator function. Two new

users, each from a different department, need to access data in two HCP tenants named: Financials Payable and Financials Receivable. Which action should the administrator perform to make this happen?

- A. Create two new user accounts with security permissions.
- B. Create default accounts named Financials Payable and Financials Receivable for each user.
- C. Create a data access account for each user.
- D. Create two system administration accounts.

Correct Answer: C

QUESTION 5

What is a valid HCP configuration?

- A. 2 node HCP 300 with RAID 5 (5+1) DPL2
- B. 4 node HCP 300 with RAID 6 (5+2) DPL2
- C. 4 node HCP 500 with RAID 5 (5+1) DPL2
- D. 4 node HCP 300 with RAID 5 (5+1) DPL2

Correct Answer: D
