QUESTION 1

You have performed an upgrade on a customer's HCP. You complete the upgrade and verify that all the nodes are online and then give the system back to the customer. A few minutes later, the customer complains that they can read existing content but they cannot create new content on the HCP. Which step was missed?

- A. The install user password was changed.
- B. The upgrade was not committed.
- C. The rollback was not performed.
- D. The system management console is disabled.

Correct Answer: B

QUESTION 2

A customer wants to ingest around 1 million files residing in several Windows 2003 and RedHat Linux servers into three newly created HCP tenants and namespaces. Which two procedures do you recommend? (Choose two.)

- A. Use copy, move and create directory functions available from HCP client tools for Linux.
- B. Use copy, move and create directory functions available from Linux server.
- C. Use copy, move and create directory functions available from HCP client tools for Windows.
- D. Use copy, move and create directory functions available from Windows server.

Correct Answer: AC

QUESTION 3

A customer has implemented a HCP within their data center. They want to be able to back up the default tenant to VTL locally. What should be enabled on the HCP to allow this type of backup?

- A. HDPS
- B. NTMP
- C. HCPB
- D. NDMP

Correct Answer: D

QUESTION 4

When connecting HCP nodes to the storage SAN fabric, which two approaches must be used? (Choose two.)

- A. Connect port 1 on each node in the HCP system to an even port on the fabric switch.
- B. Connect port 0 on each node in the HCP system to an even port on the fabric switch.
- C. Connect port 0 on each node in the HCP system to an odd port on the fabric switch.
- D. Connect port 1 on each node in the HCP system to an odd port on the fabric switch.

Correct Answer: BD

QUESTION 5

Which three make up a HCP object? (Choose three.)

- A. fixed content data
- B. file share information
- C. encryption information
- D. system policy metadata
- E. custom metadata

Correct Answer: ADE
