QUESTION 1

One CCI instance fails to start. You decide to review the HORCM logs to determine what is wrong. Where are the logs stored?

A. Under /var/adm.

B. On the Command Device.

C. Always under Horcm/log/curlog.

D. It depends on the environment variable.

Correct Answer: D

QUESTION 2

While testing a TrueCopy Asynchronous implementation, the pairs in a Copy Group suspend unexpectedly. It is determined that the suspend is due to a sidefile puncture. Which three criteria must be considered when determining the cause of the sidefile puncture? (Choose three.)

A. insufficient journal space

B. insufficient cache memory

C. remote link distance too long

D. insufficient remote link bandwidth

E. excessive contention on secondary Array Groups

Correct Answer: BDE

QUESTION 3

You have set up a Microsoft Cluster "file share" resource called "EngDep". This is dependent on a physical disk resource called "DiskE" and on a Generic Script resource called "HSCScript", which is the Hitachi Storage Cluster (HSC) script. In which file is the HORCM instance defined that needs to be active for these resources?

A. DiskE.conf

B. horcm0.conf

C. EngDep.conf

D. HSCScript.conf

Correct Answer: D

QUESTION 4

A customer wants to use TrueCopy Asynchronous to copy databases to a data center 200km away from the primary site. The applications for these databases have very severe SLAs. Which two factors must be considered? (Choose two.)

A. All data volumes must be controlled by a file system.

B. All data volumes in the target storage unit must be offline.

C. All data volumes in the database must be in the same Consistency Group.

D. All data volumes in the database must be on the same type of RAID to ensure good performance.

Correct Answer: BC

QUESTION 5

A customer uses ShadowImage At-Time Split to create a copy of an online Oracle database so that it can be mounted and started on another server for testing purposes. What will the database do on the recovery server when it starts to ensure that the transactions are restored to a point in time?

A. Roll forward the redo logs.

B. Perform a database dump.

C. Transition into hot backup mode.

D. Create copies of the archive logs.

Correct Answer: A
