QUESTION 1

Which three resources can be found in the Heroku Elements Marketplace? (Choose three.)

- A. Heroku Buttons
- B. Buildpacks
- C. Heroku Stacks
- D. Docker image files
- E. Add-ons

Correct Answer: ABE

QUESTION 2

Universal Containers has a microservices architecture on Heroku. One microservice, named the Metrics Microservice, periodically fetches metrics from a fleet of IoT sensors. Then, the Metrics Microservice is required to send relevant metrics to each of the other microservices using REST. When a new microservice is added to the architecture, the Metrics Microservice must send metrics to that new microservice too. As a result, adding microservices to the architecture causes performance issues.

How should an Architect recommend changing this architecture to improve its scalability?

- A. Configure each microservices to directly fetch the sensor metrics that are relevant to it.
- B. Use Private Space DNS Service Discovery to reduce the amount of time required for the Metrics Microservice to obtain each other microservice's IP address
- C. Configure the other microservices to pull the Metrics Microservice for updates every five seconds
- D. Use Apache Kafka on Heroku to publish metrics to a topic that the other microservices can consume.

Correct Answer: D
