**QUESTION 1**

Alfalfa thrives on land which contains lime, and gives poor results when this ingredient is deficient. The explanation is simple: there is a community of interest between the very low microscopic animal life, known as bacteria, and plant life, generally. In every ounce of soil there are millions of these living germs which have their allotted work to do, and they thrive best in soils containing lime. If one digs up a root of alfalfa (it need not be an old plant, the youngest plant will show the same peculiarity), and care is taken in exposing the root (perhaps the best method is the washing away of the surrounding earth by water), some small nodules attached to the fine, hair-like roots are easily distinguished with the naked eye. These nodules are the home of a teeming, microscopic, industrious population, who perform their allotted work with the silent, persistent energy so often displayed in nature.

The author of the passage suggests which of the following about bacteria?

- A. Bacteria feeds on lime.
- B. Bacteria is visible to the human eye.
- C. Bacteria is compact by nature.
- D. Bacteria is a plant, not an animal.

Correct Answer: B

QUESTION 2

Convert 0.125 into fraction form.

- A. $\frac{1}{2}$
- B. $\frac{1}{4}$
- C. $\frac{1}{16}$
- D. $\frac{1}{8}$

Correct Answer: D

QUESTION 3

A rental tool company has the following inventory:

25 chain saws, 14 snow blowers, 18 floor sanders, 12 leaf blowers and 19 power washers.

If 25% of the total inventory is available for rental, how many tools can be rented?

- A. 22
- B. 20
- C. 66
- D. 44

Correct Answer: A

QUESTION 4

Select the meaning of the underlined word in the sentence.

The girl hadn\'t eaten properly for weeks; her cheekbones were nearly concave in shape.

- A. extended
- B. extinguished
- C. bowed inward
- D. bulging

Correct Answer: C

QUESTION 5

What are isotopes?

- A. Elements which have the same number of protons but a different number of neutrons.
- B. Elements with the same atomic number but different atomic mass numbers.
- C. Elements which have a different number of protons than electrons.
- D. Both A and B are correct.

Correct Answer: D
