QUESTION 1

Your customer implements some changes within the existing TCP/IP environment. The changes affect the existing HP StoreOnce Multi-node environment and the current backup infrastructure. How can you apply the new network configuration on the HP StoreOnce 6500 Backup system?

- A. Replace the old configuration with the correct TCP/IP information using the CLI parameter Pnet set change, and reboot the cluster nodes.
- B. Configure an alternate network template, and then re-apply the template with all the modified network settings.
- C. Access the console of the first node, change all the parameters, and sync the nodes within the cluster.
- D. Modify the configuration using the GUI (Device configuration - Network), and apply the configuration.

Correct Answer: A

QUESTION 2

What is the repository (/jail) directory on the local node's file system most commonly used for?

- A. encryption keys
- B. configuration files
- C. system log files
- D. support tickets

Correct Answer: D

QUESTION 3

Which statement is correct regarding the use of security erase jobs?

- A. They will run once a week.
