#### QUESTION 1

Which key customer persona is most likely involved in Automation and Cloud Management buying decisions?

- A. CIO
- B. system administrator
- C. CTO
- D. CSO

Correct Answer: C

---

#### QUESTION 2

What are the primary competitive differentiators for HP Database and Middleware Automation that differentiates HP from its competitors? (Select two.)

- A. superior security of physical and virtual environments that host database estates
- B. superior root-cause analysis that maintains accuracy for databases and application servers
- C. provides database and middleware lifecycle management
- D. out-of-the-box content based on industry best practices
- E. broader database and middleware vendor support

Correct Answer: BD

---

#### QUESTION 3

Which customer profile is the best target for HP Software Process Orchestration solutions? (Select three.)

- A. customers with poor communication and hand-off between IT domains
- B. customers with a heavy reliance on proprietary scripting methods
- C. customers failing SLAs due to high mean time to repair (MTTR)
- D. customers who want a modern and powerful virtual user generator
- E. customers who want to cut costs by reducing application performance issues in production customers with high server-to-administrator ratios

Correct Answer: ABE

---

#### QUESTION 4

---

What is the correct value proposition for the HP Software Server Automation Ultimate Edition solution?

- A. reduces downtime and mean time to repair (MTTR) through root-cause analysis that maintains accuracy for dynamic networks
- B. provides secure, scalable, and automated server configuration and lifecycle management for the enterprise hybrid data center
- C. consolidates and correlates server fault and performance events across the entire physical and virtual IT infrastructure
- D. integrates server monitoring and universal log management further reducing the time to troubleshoot tough-to-diagnose problems

Correct Answer: B

---

#### QUESTION 5

Which Task Automation challenges are faced by operations personnel and solved by HP Server Automation Premium Edition? (Select two.)

- A. How can I improve time-to-value in the provisioning of application development environments?
- B. How can I pre-empt problems before they cause an outage?
- C. How do I guarantee my service desk tickets are prioritized?
- D. How can I distribute security updates (patches) in my environment in an agile and reliable manner?
- E. How can I better monitor security breaches?

Correct Answer: AD
