### QUESTION 1

What is true about the HP Server Automation Premium Edition solution?

- A. provides automatic tracking of storage utilization at array, switch, volume, and application level
- B. consolidates and correlates server fault and performance events across the entire physical and virtual IT infrastructure
- C. integrates server monitoring and universal log management, further reducing the time to troubleshoot tough-to-diagnose problems
- D. offers a lower-cost solution that simplifies the setup and reduces the time needed to manage the physical and virtual servers in a data center

Correct Answer: D

---

### QUESTION 2

Which HP Database and Middleware Automation value best resonates with the persona involved in Task Automation?

- A. security of virtual farms hosting clustered database systems
- B. end-to-end transaction and service level management through proactive end-user monitoring
- C. delivery of industry-standard best practices and subject matter expertise
- D. time value of data capture, coupled with immediate rich analytics insight

Correct Answer: A

---

### QUESTION 3

Which specific challenges are faced by operations personnel and solved by the HP Server Automation Premium Edition solution? (Select two.)

- A. The patching of the Oracle database estate is resource-intensive.
- B. Fulfilling PCI compliance requirements in a timely manner is impossible.
- C. There is no tracking of storage utilization at array, switch, volume, and application level.
- D. Mean time to repair (MTTR) of network devices is too long, resulting in failed SLAs.
- E. Change execution is slow and error-prone.

Correct Answer: AB

---

### QUESTION 4

Which Transforming Service Delivery discovery question should you ask an IT executive in order to uncover a Cloud Service Automation pain point?

- A. Are you concerned about compliance, security, or governance with regards to your public cloud services?
- B. Do you have the ability to integrate database fault, availability, performance, and configuration management?
- C. Are you able to audit network device changes down to the keystroke change level?
- D. Are you spending more time gathering and formatting data and less time on results analysis?

Correct Answer: B

---

#### QUESTION 5

What is the correct value proposition for the HP Software Database and Middleware Automation solution?

- A. monitors administrative tasks such as provisioning, compliance, patching, and release management associated with databases and application servers
- B. reduces downtime and mean time to repair (MTTR) through root-cause analysis that maintains accuracy for databases and application servers
- C. prevents unauthorized security breaches of environments hosting back-end databases
- D. delivers industry-standard best practices to address challenges around compliance, middleware, and database patching, and code release

Correct Answer: A
