QUESTION 1

Which learn is most appropriate for HP Quality Management solutions\?

- A. a newly formed agile project team that needs a centralized agile management tool that can integrate with existing HP ALM solutions
- B. a small QA team that relies on manual functional testing but needs to improve testing efficiency with tools that accelerate manual testing
- C. a QA team managing medium to large releases who may benefit from centralized planning and managed automation
- D. a team of developers who are project focused and could benefit from service virtualization to remove testing constraints

Correct Answer: D

QUESTION 2

Why is the concept of Continuous Integration and Testing important to the Agile conversation?

- A. Merely increasing the pace of development without addressing the full software development lifecycle will cause bottlenecks in other aspects of the lifecycle.
- B. It increases the total number of sprints required to complete a software project and will reduce delivery costs and increase quality.
- C. It gives organizations the ability to align business processes and functional testing with performance and security testing to ensure better quality.
- D. Simply reducing the total number of sprints required to complete a software project will reduce delivery costs and increase quality.

Correct Answer: B

QUESTION 3

Which business challenge is driving customers to become more agile and efficient?
