QUESTION 1

What is the value of the HP SaaS offering for Application Lifecycle Management to a customer with cost concerns?

A. It can demonstrate a faster time to value and have lower TCO.

B. It has user functionality that the on-premise option does not provide

C. It can improve all aspects of lifecycle management.

D. It reduces the amount of functional testing that an organization needs to automate.

Correct Answer: B

QUESTION 2

Which primary benefit does HP Service virtualization provide to the director of quality assurance?

A. Virtualization improves test execution efficiency by removing scheduling constraints from the testing team

B. Virtualization directly affects customer satisfaction in case of system outages or degraded levels of operations.

C. Virtualization reduces IT costs and helps to modernize applications

D. Virtualization improves customer quality, improving collaboration.

Correct Answer: A

QUESTION 3

What is a benefit of HP ALM over similar competitor products?

A. It is focused on the developer market and is developer-centric.

B. It is priced competitively in the market and includes a number of features that are free of charge.

C. It is highly rated by market analysts such as Gartner

D. It is technology and methodology agnostic and integrates the entire application lifecycle.

Correct Answer: B

QUESTION 4

During performance testing, which solution capabilities allow testers to identify and eliminate performance bottlenecks?

A. defect tracking, reporting, and diagnostics

B. test planning, scheduling, and execution

C. monitoring, analysis, and diagnostics

D. real-time reporting in Quality Center

Correct Answer: C

QUESTION 5

A customer is struggling to complete its planned testing, and its ratio of tests planned to tests executed is at an all-time low. Which solution propositions will most likely resolve the customer\'s concerns? (Select two.)

A. Decentralizing test management reduces the need for collaboration and more time becomes available for testing

B. Manual testing can be accelerated with a good authoring and execution solution that automates data injection and improves communication of defects with development.

C. Mirror testing multiple environments at the same time can save time.

D. Requirements can be managed, the risk of noncompliance mitigated, and test management with HP Quality Center or HP Applications Lifecycle Management centralized.

E. Automation can reduce the test duration, which increases the amount of testing that can be completed and improves overall quality of the application

Correct Answer: AE
