QUESTION 1

What is a benefit of using LoadRunner for load testing?

- A. to identify all functional problems of mission-critical applications
- B. to reduce developers\' coding work load
- C. to simulate all customer environment configurations
- D. to expose application problems before your customers find them

Correct Answer: B

QUESTION 2

Place the steps of the basic TruClient workflow in the correct order.

Select and Place:

Replay VUser in Load Mode

Replay basic script

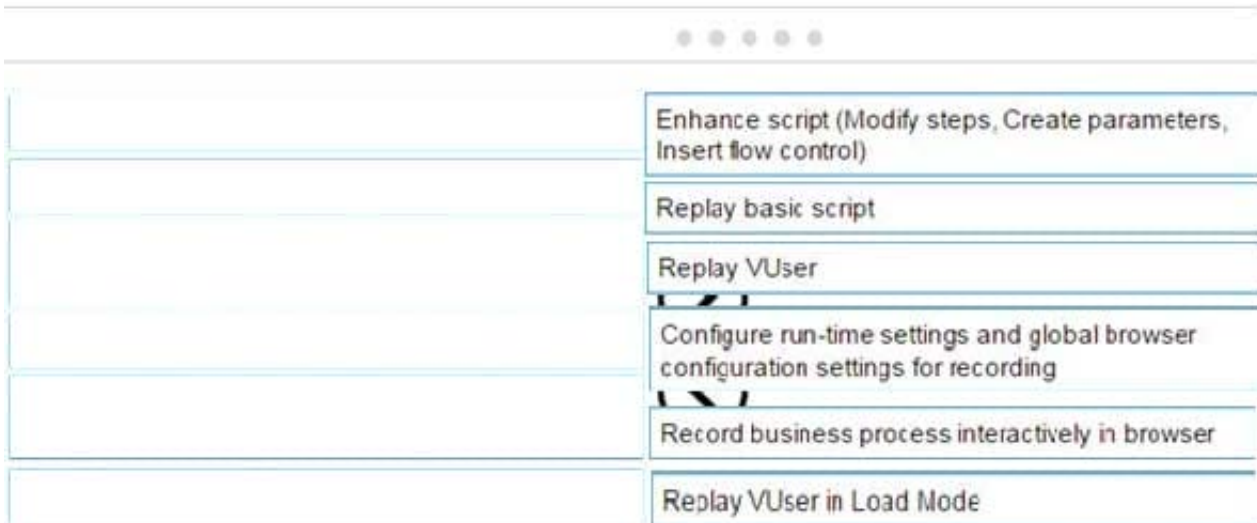

Enhance script (Modify steps, Create parameters, Insert flow control)

Record business process interactively in browser

Configure run-time settings and global browser configuration settings for recording

Replay VUser

Correct Answer:

QUESTION 3

What should you do to enable the improved Replay Summary statistics in VuGen?

- A. Navigate to Tools > Options > Scripting > Replay and check the Collect Replay Statistics option within VuGen.
- B. Navigate to Tools > Options > Scripting > Replay and check the Generate report during script execution option within VuGen.
- C. Set COLLECT_REPLAY_STATISTICS to True in the vugen.ini configuration file found in the config folder within the LoadRunner installation directory.
- D. Navigate to Run-Time settings > Replay and check the Collect Replay Statistics option within the script.

Correct Answer: B

QUESTION 4

How is the run logic in a TruClient script controlled?

- A. Run logic is not applicable to TruClient protocol, as TruClient scripts contain no actions.
- B. The TruClient Sidebar handles all the run logic for the TruClient script.
- C. In the same way as the Web (HTTP/HTML) protocol script, with Vuser_init, one or more action sections, and a Vuser_end.
- D. TruClient scripts contain one action only.

Correct Answer: D

QUESTION 5

What best describes the configuration options available when adding Load Generators to a LoadRunnersscenario?

- A. Cloud-based Load Generators can only use images provided by HP.
- B. Cloud-based Load Generators can use images provided by HP or custom images created by the user.
- C. A scenario must use all cloud-based or on-premise Load Generators, not a combination.
- D. Cloud-based Load Generators must be provisioned one at a time.

Correct Answer: C
