QUESTION 1

Which JL04 functionality enables secure export of the Active Health Log to HP Support?

A. Intelligent Provisioning

B. Agentless Management Service

C. Embedded Remote Support

D. Intelligent Resilient Framework

Correct Answer: C

Explanation:

Embedded Remote Support

Embedded Remote Support enables you to easily and securely export the Active Health file to an HP Support professional to help resolve issues faster and more accurately. HP Support can receive this data automatically, so it can solve even the most elusive, intermittent issues in a minimum amount of time and with little effort by the local administrator.

QUESTION 2

What are benefits of implementing a blade architecture instead of traditional rack mount server?

A. Embedded Disaster recovery capability

B. Shared I/O infrastructure

C. More predictable MTBF

D. Reduce Power Infrastructure

E. Shared Memory

Correct Answer: BD

QUESTION 3

You need to verify the System ROM version installed on a number of different HP server models. Select the tool you should use for each server model. Tool choices may be selected more than once.

QUESTION 4

What is NVMe?

A. An updated version of the Versa Module Europa (VME) bus technology

B. A standard for thin provisioning of virtual machines

C. An implementation of mirrored non-volatile memory

D. A bus technology used for accessing Solid State Drives (SSDs)

Correct Answer: D

Explanation:

NVMe and SCSIe performance

NVM Express (NVMe) is a high-performance, scalable host controller interface (Figure 1-9) designed for enterprise, data center, and client systems that use PCIe SSDs. The NVMe standards-based approach can be adopted across multiple platforms, ensuring interoperability of PCIe SSDs. With a standardized interface for PCIe SSDs, operating systems need only one driver to work with all SSDs in the system that conform to the standard.

QUESTION 5

Which HP server architecture enables customization of server networking adapters?

A. FlexibleLOM

B. FlexLayer

C. FlexAttach

D. FlexNetwork

Correct Answer: A

Explanation:

the past several years but are not current IT trends.

2. ☑ **B.** Flexible LOM technology allows customers to select a NIC that provides the functions and bandwidth they need, without being limited by the NIC that is embedded on the system board. *For more information, see Chapter 1.*
