QUESTION 1

Refer to the exhibit.

A customer has upgraded the first of their two HPE StoreServ 8200S to the latest InForm OS version to take advantage of the compression feature. You have been asked to design the storage configuration to support Oracle Database volumes to utilize HPE 3PAR compression.

Based on the analysis of the array, what would be your suggestion to implement the requested change?

- A. Consider adding another node pair for compression to work efficiently.
- B. Install the Catalyst agent on the Oracle server to enable inline compression on the selected VV.
- C. Configure the source-side compression to offload compression to the host.
- D. Balance the workloads between the arrays to have enough headroom for compression.

Correct Answer: C

QUESTION 2

A customer is a cloud service provider with infrastructure powered by HPE 3PAR StoreServ 9000. The customer is concerned about their ability to ensure the quality of service and protect their tenants from unpredictable bursts of I/O from other tenants.

What should you recommend to your customer?

- A. Use Priority Optimization to enable service levels for workloads.
- B. Use Adaptive Optimization to optimize service levels autonomically.
- C. Use Dynamic Optimization to automatically manage quality of service.
- D. Use Virtual Domains to automatically set multi-tenant policies.

Correct Answer: A

QUESTION 3

A customer uses Recovery Manager Central for VMware (RMC-V). They need the ability to perform granular recovery of application items directly from backups. Which solution integrates with RMC-V to provide the desired requirements?

- A. Veeam Backup and Replication
- B. NetBackup
- C. StoreOnce CloudBank
- D. CommVault

Correct Answer: A

QUESTION 4

Which SAN topology offers the highest centralized data access performance?

- A. ring
- B. cascaded
- C. core-edge
- D. meshed

Correct Answer: C

QUESTION 5

A customer has deployed an HPE 3PAR StoreServ 8400 array with two nodes and three additional disk enclosures. They want to expand the solution with two additional nodes and three additional disk enclosures. What must you do to expand the customer's solution?

- A. The new nodes and enclosures must be placed in an adjacent rack.
- B. The existing nodes need to be taken offline.
- C. The new disks must be imported before the new nodes can be added.
- D. The system should be updated to the latest supported OS before the hardware expansion.

Correct Answer: A
