### QUESTION 1

You completed the HPE Nimble storage replication partnership in a customer environment.

When you test the network connection from the primary partner to the secondary partner, the test fails; when you test the connection from the secondary to the primary partner, the test is successful.

What is the most likely cause of the failure?

- A. The secondary partner name is not configured properly
- B. The secondary array network ports are misconfigured
- C. The test can only be performed from the secondary array
- D. The primary partner name is not configured properly

Correct Answer: A

---

### QUESTION 2

A customer experiences a performance issues and blames the HPE 3PAR array. However, you suspect it is caused by a noisy neighbor situation in the VMware environment. Which approach should you use to find and prove a root cause?

- A. Use Brocade Network Advisor to gather data for analysis
- B. Use the advanced performance reports in SSMC
- C. Use HPE SAF Collect to gather data for SAF Analyze
- D. Use HPE InfoSight Cross Stack Analytics

Correct Answer: D

---

### QUESTION 3

How does the HPE Nimble Storage product strategy support a customer's investment protection requirements for today and the future?

- A. by supporting replication with arrays from other vendors
- B. by supporting the implementation of third party cache, spinning media, and flash media
- C. by supporting replication between current and previous-generation array models
- D. by supporting the repurposing of obsolete array controllers as high-density servers

Correct Answer: B

---

#### QUESTION 4

A customer has two HPE Nimble arrays that are replication partners. The replication schedule is set to every hour.

After replication completed at 1:00pm, the array at the primary site suffers a power failure.

Applications were failed over successfully by the administrators, and production continued on the secondary site array as designed.

At 3:00pm, the power was restored to the primary site array.

What does the administrator need to do first to restore services in the primary site?

- A. Perform handover from the secondary array to the primary array
- B. Create a new replication partnership from the primary array to the secondary array
- C. Create a new replication partnership from the secondary array to the primary array
- D. Perform a failback of the existing replication partnership to the primary array

Correct Answer: A

---

#### QUESTION 5

You want to use FCAP authentication in an environment with FOS 7.3 running switches with no extra licenses. What should you do to use this feature?

- A. Switches must be upgraded to FOS 7.4 or higher
- B. Certificates must be obtained from Brocade
- C. A Secure Fabric license must be added to all switches in the fabric
- D. Certificates must be obtained from a third-party vendor

Correct Answer: D
