### QUESTION 1

Which resource provides information for designing data protection solutions, including backup/restore/archiving using HPE StoreOnce (disk), HPE StoreEver (tape), and HPE StoreAll (NAS) storage products?

- A. HPE Enterprise Backup Solution Design Guide
- B. HPE SAN Design Guide
- C. HPE Data Agile BURA Compatibility Matrix
- D. HPE QuickSpecs

Correct Answer: C

---

### QUESTION 2

A Customer has a legal requirement to encrypt all of their backup data that goes offsite. The customer has number of sites, each containing a tape libraries are from the same manufacturer, but they all support data encryption. The customer is concerned about losing the encryption keys and the ability to restore their data.

Which solution should you recommend to meet the legal requirement and address the customer's concerns?

- A. HPE Trusted Platform Module
- B. HPE Enterprise Secure Key Manager
- C. hpe Tape Encryption Kit
- D. HPE Data-at-Rest Encryption

Correct Answer: B

---

### QUESTION 3

A customer needs to offload disk I/O caused by nightly backups from their production HPE 3PAR StoreServ Disk Array. They have two other HPE 3PAR Disk Arrays. One is located at their disaster recovery (DR) site located 300 km away, and the other is used for their Test/Dev environment located in the same datacenter.

What should you recommend to accomplish this? (Select two)

- A. Set up HPE 3PAR synchronous replication between the production and Test/Dev disk arrays.
- B. Create a snapshot of the replicated volumes on the production array and present to the backup system.
- C. Set up HPE 3PAR synchronous replication between the production and DR disk arrays.
- D. Create a snapshot of the replicated volumes on the Test/Dev array and present to the backup system.
- E. Set up HPE 3PAR enhanced asynchronous replication between the production and DR disk arrays.

Correct Answer: AD

---

#### QUESTION 4

How does differential backup differ from full and incremental backups?

- A. Backup time is shorter for differential backups than for incremental backups
- B. Full restore time is longer than the restore time of incremental backups.
- C. A complete history of files backed up is maintained with differential backups.
- D. Differential backup leaves the archive bit set

Correct Answer: D

---

#### QUESTION 5

Which capability is available to use with HPE StoreEver tape libraries, along with software drivers that provide MPIO?

- A. partitioning of tape libraries
- B. backups through Fibre Channel
- C. advanced path failover
- D. offloading backups to tape

Correct Answer: C
