QUESTION 1

Which statement describes the availability metrics for an HPE system's high availability?

- A. All standard HPE servers are designed for 99.9999% availability.
- B. A system consisting of HPE standard servers with an availability of 99.9999% and a storage system with an availability of 99.99% will have a combined availability of 99.99999%.
- C. A system with an availability of 99.99% can be expected to be in operational for 6 minutes or fewer per year.
- D. A system with an availability of 99.999% will statistically not have an unscheduled downtime of more than 1 hour total in 10 years of operation.

Correct Answer: B

QUESTION 2

An architect needs to demonstrate the financial advantages of a proposed HPE server and Hypervisor-based solution compared to a legacy server environment that has traditional servers and desktops.

Which tool should the architect use?

- A. Hyperscale Business Value Calculator
- B. Client Virtualization ROI Calculator
- C. HPE Business Technology Optimization
- D. HPE Business Process Monitor

Correct Answer: A

QUESTION 3

HPE Moonshot 180G Switch Modules and HPE Moonshot 16-SFP+ Uplink ModulesA customer is planning to replace its DAS-based third-party server solution with an HPE BladeSystem solution using FlexFabric connected to an iSCSI based HPE StoreVirtual 3200.

Which method should the architect recommend for migrating data from the old system to the new system?

- A. Use Peer Motion with a temporary 180-day license
- B. Use Business Copy software licensed to the current total size of all DAS storage
- C. Use Virtual Copy software
- D. Use a LAN-based file transfer method

Correct Answer: D

QUESTION 4

A customer needs a hosted physical desktop solution. Users will run typical office applications with limited use of some media-rich applications such as Adobe Photoshop. The customer needs the densest and most cost-effective solution that can support such users.

Which HPE Moonshot cartridge should the architect recommend?

- A. HPE m710
- B. HPE m400
- C. HPE m700
- D. HPE m710p

Correct Answer: D

QUESTION 5

An architect has selected the FlexibleLOM option for HPE XL230a compute trays, which will host an HPC application.

When should the architect select a FlexibleLOM adapter that supports Fibre Channel over Ethernet (FCoE)?

- A. when the application uses parallel computing and relies on Fibre Channel to reduce latency for communications between compute nodes
- B. when the application requires high throughput between processors and disk drives local to the same compute tray
- C. when the application uses a Fibre Channel storage area network (SAN) for its shared storage solution
- D. when the application requires additional bandwidth and needs a solution for load sharing traffic over multiple links

Correct Answer: A
