QUESTION 1

A customer needs a new high frequency trading cluster. Their current cluster has non-deterministic performance and undesirable latency. Because high frequency trades are extremely time-sensitive transactions, the customer cannot tolerate the microseconds of delay that can randomly occur on their current cluster.

Which iLO 5 Gen 10 feature can you propose to address this technical requirement?

- A. Turbo Cores
- B. Jitter Smoothing
- C. Persistent Memory
- D. NVMe Drives

Correct Answer: C

QUESTION 2

You prepared a proposal for a customer that plans to deploy Hyper-V clusters that include network adapters with RoCE support. The customer would like to know why this specific adapter was included in the proposal.

How would you explain your choice?

- A. RoCE adapters offer Secure Encryption functionality that can help to secure migration traffic
- B. RoCE adapters are the only adapters certified to use in Hyper-V based cluster
- C. RoCE adapters can use 100 Gb/s speed for internal virtual machine migrations
- D. RoCE adapters will improve performance for live migration and Microsoft SMB Direct environments

Correct Answer: D

QUESTION 3

A customer is purchasing a large number of servers for a business critical application. They are concerned about return to service times and want immediate assistance with critical events. Which HPE service meets the customer's needs?

- A. HPE Proactive Service Credits
- B. HPE Proactive Care Advanced
- C. HPE Proactive Care
- D. HPE Foundation Care

Correct Answer: C

QUESTION 4

A customer is considering installing a Synergy frame in an existing rack where their c7000 chassis is currently installed.

Which question should you ask to ensure the new frame will be supported in the rack?

- A. Are there any third party servers installed?
- B. How deep is the existing rack?
- C. Is there a UPS installed in the rack?
- D. How wide is the existing rack?

Correct Answer: B

QUESTION 5

A customer uses VLANs in their network. They recently acquired another company and need to extend the number of VLANs to 7400 to accommodate the growth. What should you advise?

- A. Implement an IPv6 only environment
- B. Edit the /etc/network/config file, and set VLAN_LIMIT=7401
- C. Upgrade the NICs to models that support RoCE
- D. Transition to a VXLAN or NVGRE network configuration

Correct Answer: D
