-  **800,000+** Satisfied Customers

QUESTION 1

A customer needs a new compute environment based on HPE Synergy with VMware vSphere 6.5. This needs to interact with the customer's existing network consisting of 300 independent global sites. Each site has 15 unique VLANs. What network technologies would you recommend to meet the customer requirements?

- A. NVGRE increasing the amount of separated Layer 2 segments
- B. VxLAN as it allows flexibility and suitable for multitenant environment
- C. RDMA as it increases host efficiency and virtualization performance
- D. VLANs as it supports up to 4094 VLAN ids

Correct Answer: B

QUESTION 2

You are configuring a new server for a customer. The customer has given you the following information regarding their environment: 2 processors with 22 cores 256GB RAM 600GB of usable internal storage 10GB network, dual connections iLO Advanced 3 years of 7x24 basic support

Which additional information do not need to determine the best option for internal storage?

- A. Does the application require a large memory footprint
- B. Does the application require RoCE capable adapters?
- C. Is the application workload sensitive to I/O latency?
- D. Will a Fibre Channel card be required?

Correct Answer: C

QUESTION 3

A customer wants to implement HPE Synergy with 20Gb connectivity.

What should an architect emphasize during a meeting with this customer?

- A. A maximum of 3 frames can be stacked together when 20 Gb connectivity is required.
- B. SAS connectivity will be supported only on third fabric.
- C. A Composer must be installed in each frame.
- D. 20Gb connectivity will require additional licenses applied to the downlink ports.

Correct Answer: A

QUESTION 4

During a presentation on Synergy fabric technology, a customer states that they would not purchase Virtual Connect modules because they would be paying for Fibre Channel technology that they have no intention of using.

How should you handle this objection?

- A. Explain to the customer that the only Fibre Channel support is through FCoE and does not add to the module cost.
- B. Explain to the customer that HPE does not pass on the cost of including Fibre Channel support to the customer.
- C. Inform the customer that native Fibre Channel support is an optional, licensed feature.
- D. Inform the customer that native Fibre Channel support is provided through an optional daughterboard.

Correct Answer: D

QUESTION 5

DRAG DROP

Match each HPE technology solution to the customer's business need that it can fulfill.

Select and Place:

Technology

HPE ConvergedSystems 500

HPE D2220sb Storage Blade

HPE SB3000c Tape Blade

HPE SimpliVity

Business Need

Dedicated storage with a one-to-one server-to-storage ratio

High Availability & Disaster Recovery

Mission Critical workloads

One button Disaster Recovery

Correct Answer:

Technology

Business Need

	HPE D2220sb Storage Blade
⏪	HPE SimpliVity
⏩	HPE ConvergedSystems 500
	HPE SB3000c Tape Blade
