QUESTION 1

A customer wants to use iLO Federation to manage firmware deployments with HPE SUM. Which options are included? (Select two.)

- A. Automatically discover iLO Federation groups on the same management network
- B. Apply updates to all members of iLO Federation group with an iLO standard license
- C. iLO federation is leveraging ICsp functionality to update firmware
- D. Update all applicable firmware on HPE ProLiant servers through the iLO using offline deployment
- E. Update the iLO firmware and system ROM offline through the iLO Federation group

Correct Answer: BD

QUESTION 2

During a presentation on Synergy fabric technology, a customer states that they would not purchase Virtual Connect modules because they would be paying for Fibre Channel technology that they have no intention of using.

How should you handle this objection?

- A. Explain to the customer that the only Fibre Channel support is through FCoE and does not add to the module cost.
- B. Explain to the customer that HPE does not pass on the cost of including Fibre Channel support to the customer.
- C. Inform the customer that native Fibre Channel support is an optional, licensed feature.
- D. Inform the customer that native Fibre Channel support is provided through an optional daughterboard.

Correct Answer: D

QUESTION 3

A customer completed a successful Synergy PoC consisting of a single frame with dual composers and dual Virtual Connect SE 40Gb F8 modules. The customer needs additional frames to allow for growth. They require 20GB to each compute module.

How many additional frames can be added to the existing logical enclosure?

- A. 1
- B. 2
- C. 3

D. 5

Correct Answer: C

QUESTION 4

You have a customer who has thousands of ProLiant servers spanning Gen8, Gen9, and Gen10 across multiple server models (Rack, Tower, Blade, Apollo), all licensed with iLO Advanced. The customer needs an effective way to inventory and update the firmware across the environment.

Which tool should you recommend?

- A. iLO Amplifier Pack
- B. OneView
- C. Intelligent Provisioning
- D. SUM (System Update Manager)

Correct Answer: A

QUESTION 5

A customer uses VLANs for tenant network separation. However, they are not satisfied with the scalability limits of the setup.

Which networking technology will help the service provider to overcome these performance limits?

- A. data center bridging (DCB)
- B. RDMA over Converged Ethernet (RoCE)
- C. network virtualization generic routing encapsulation (NVGRE)
- D. remote direct memory access (RDMA)

Correct Answer: C
