QUESTION 1

A customer has an HPE FlexFabric data center network, which was working correctly. Then the customer added VMware NSX, and now VM-to-VM traffic in logical networks is not being forwarded by the network infrastructure.

Could this be the issue?

The FlexFabric switches are not configured with an expanded VLAN set to match the VNIs in logical switches.

A. Yes

B. No

Correct Answer: B

QUESTION 2

A customer has a Red Hat OpenShift Container Platform (OCP) solution. You suggest deploying HPE Nimble and the HPE CSI Driver.

With this proposal, can HPE Nimble fulfill this role for the solution?

Host images for the private registry.

A. Yes

B. No

Correct Answer: B

QUESTION 3

A customer has a Microsoft Hyper-V virtualized environment. You are helping a customer replace some of the hosts with an HPE SimpliVity cluster.

Is this a correct guideline for adding and managing the new cluster?

Obtain scripts from HPE to use with the HPE Deployment Manager with Microsoft System Center Virtual Machine Manager (SCVMM).

A. Yes

B. No

Correct Answer: B

QUESTION 4

A customer has a virtualized data center that uses VMware. The virtualized workloads include latency-sensitive databases. You are considering proposing that the customer move the workloads to HPE SimpliVity.

Does this correctly describe how well HPE SimpliVity can handle the latency-sensitive workloads?

HPE SimpliVity helps to support low latency by localizing a VM's data on both the node that runs the VM and a backup node that runs the VM if the first node fails.

A. Yes

B. No

Correct Answer: A

QUESTION 5

A customer is virtualizing some of their data center production networks with NSX. You are helping with the plan.

Is this a valid design for routing within the NSX solution?

routing traffic between VXLANs (logical networks) locally on each ESXi host by deploying a distributed logical router (DLR) to an edge cluster

A. Yes

B. No

Correct Answer: A
