**QUESTION 1**

You are helping a customer optimize their current data protection solution. They have a vital business application with a database that runs on PostgreSQL on Linux. They are concerned about disaster recovery and ask if this data can be restored in an application-consistent way. Is this a valid response regarding the customer's environment and concerns? Solution: Use the PostgreSQL backup mechanism to create a consistent backup to a dump file. Then, use the backup solution to provide application-consistent backups.

A. Yes

B. No

Correct Answer: A

QUESTION 2

You are running a Proof-of-Concept for a customer's new data protection solution based on Veeam and HPE StoreOnce. You want to demonstrate the source-side deduplication features of the solution, to reduce the volume of data being sent across the network, is this a parameter that should be set? Solution: 'Source Side deduplication' in the Global Deduplication section of the HPE StoreOnce system

A. Yes

B. No

Correct Answer: A

QUESTION 3

A customer wants to replace an aging tape-based backup platform using a Grandfather-Father-Son (GFS) rotation scheme. They are considering replacing the entire solution with public cloud storage as a backup target. Is this a valid recommendation for this customer? Solution: Avoid using public cloud storage as a target in this scenario, since they cannot deliver the same SLAs as the local on-premises backup solution based on HPE StoreEver

A. Yes

B. No

Correct Answer: B

QUESTION 4

You need to meet with a customer about replacing their aging EMC Data Domain-based platform with a new solution. Is this a tool that you could use to effectively assess current backup deployment? Solution: NinjaStars

A. Yes

B. No

Correct Answer: B

QUESTION 5

Is this a valid statement regarding Commvault components? Solution: A Client Is a software module that is installed on a client computer to protect a specific type of data.

A. Yes

B. No

Correct Answer: A
