QUESTION 2

How does HPE Smart Rate technology benefit your customers?

- A. It provides real-time port statistics and utilization so customers can determine if the device connected to the port requires additional bandwidth.
- B. It autosenses the amount of power a device needs on a Power over Ethernet Plus (PoE+) port.
- C. It allows customers to use their existing cabling, which traditionally supports speeds up to 1 Gbps, to achieve higher speeds.
- D. It auto-negotiates port capabilities such as one-way or two-way traffic between the device and the port.

Correct Answer: C

QUESTION 3

You are explaining the HPE SimpliVity HyperGuarantee to a customer. How can you describe the Hyper Protected part of this guarantee?

- A. HPE SimpliVity is protected against hardware defects, ensuring customers receive replacement parts within 1 business day.
- B. Customers can quickly back up or restore large amounts of data, such as 1 TB virtual machine in less than one minute.
- C. Customers receive a one-year subscription of malware detection software when purchasing HPE SimpliVity.
- D. HPE SimpliVity includes a stateful firewall, which enables policy-based management.

Correct Answer: B

QUESTION 4

How do a company's IT requirements change when implementing a hyperconverged solution?

- A. IT specialists are needed to manage the storage, server, and networking components.
- B. IT has a suite of tools to plan and optimize the storage and server components.
- C. An IT generalist can manage the entire hyperconverged solution.
- D. IT can maintain their server and storage siloes while reducing the time it takes to manage them.

Correct Answer: B

QUESTION 5

What benefit does the Aruba AppRF feature provide your customers?

- A. It dynamically adjusts the radio power to reduce interference in high-density AP environments.
- B. It connects clients to the best available AP, eliminating issues caused by clients that stick to an AP even if the signal strength is weak.
- C. It inspects wireless traffic to monitor how applications are used and to give priority to business-critical applications.
- D. It improves wireless performance by moving AP radios to channels that are not experiencing RF interference.

Correct Answer: C
