QUESTION 1

How does HPE Smart Rate technology benefit your customers?

- A. It provides real-time port statistics and utilization so customers can determine if the device connected to the port requires additional bandwidth.
- B. It autosenses the amount of power a device needs on a Power over Ethernet Plus (PoE+) port.
- C. It allows customers to use their existing cabling, which traditionally supports speeds up to 1 Gbps, to achieve higher speeds.
- D. It auto-negotiates port capabilities such as one-way or two-way traffic between the device and the port.

Correct Answer: C

QUESTION 2

Which describes the HPE SimpliVity 380?

- A. Software-defined and hardware optimized
- B. Built on the HPE Apollo Gen10 Server
- C. Designed specifically for companies that need a VDI solution but have space constraints
- D. Optimized for compute-intensive workloads, rather than storage-intensive workloads

Correct Answer: A

QUESTION 3

What advantage does the HPE SimpliVity deduplication feature provide?

- A. The deduplication feature runs periodically on the storage devices, continually compressing data and freeing up storage space.
- B. The always-on deduplication feature ensures that data is deduped on the first I/O.
- C. SimpliVity uses a proprietary hypervisor, which dedupes the data before it is sent to the Data Virtualization Layer.
- D. SimpliVity saves the data to disk before deduping it, ensuring no data loss.

Correct Answer: B

QUESTION 4

What is one difference between HPE Proactive Care and HPE Proactive Care Advanced?

- A. HPE Proactive Care Advanced includes a local, assigned account support manager.
- B. HPE Proactive Care Advanced provides problem resolution services including 24x7 monitoring.
- C. HPE Proactive Care Advanced includes firmware and patch analysis.
- D. HPE Proactive Care Advanced provides scans and tailored reports on the customer's environment.

Correct Answer: A

QUESTION 5

How do a company's IT requirements change when implementing a hyperconverged solution?

- A. IT specialists are needed to manage the storage, server, and networking components.
- B. IT has a suite of tools to plan and optimize the storage and server components.
- C. An IT generalist can manage the entire hyperconverged solution.
- D. IT can maintain their server and storage siloes while reducing the time it takes to manage them.

Correct Answer: B
