QUESTION 2

What advantages do Unified APs (UAPs) offer your customers?

A. UAPs can be licensed as sensors or as APs, allowing customers to use the same hardware to enable and monitor the wireless network.

B. UAPs are 802.11ac Wave 1 APs, which can be updated to 802.11ac Wave 2 APs.

C. UAPs have one radio that supports 802.11n and one radio that supports 802.11ac.

D. UAPs can be deployed initially as Instant APs and then later converted to controlled APs

Correct Answer: A

QUESTION 3

What is one way HPE InfoSight closes the app-data gap?

A. It consolidates multiple arrays and pools the storage within a virtualized environment.

B. It improves application performance by covering compute and storage.

C. It monitors the customer\\'s environment and resolves issues before they disrupt the business.

D. It provides multicould mobility so that IT can easily move data between on-premises arrays and the cloud.

Correct Answer: B

QUESTION 4

How does HPE SimpliVity 380 deliver better data efficiency that other hyperconverged solutions without compromising application performance?

A. It offloads optimization to HPE SimpliVity Accelerator Card so compute resources can run virtual machines (VMs).

B. It provides more DRAM to handle optimization, deduplication, and compression functions.

C. It runs optimization, deduplication, and compression as background processes and prioritizes applications.

D. It dedicates one compute resource to optimization, reserving the other compute resources for applications.

Correct Answer: C

QUESTION 5

What is the danger of firmware attacks?

A. They cause the server to immediately shut down, creating a service outage.

B. They render the server unusable since there is no way to remediate them.

C. They are the most common entry point for a ransomware attack.

D. They are difficult to detect and can be one of the most damaging.

Correct Answer: B
