-  **800,000+** Satisfied Customers

### QUESTION 1

What is required in order to prevent other hosts from mounting the source volume in the Peer Motion import stage migration workflow even after the migration?

- A. Set an SCSI Buffer Queue Full on each source volume.
- B. Set a longer SCSI time-out value on each source volume.
- C. Set the SCSI time-out value to zero on each source volume.
- D. Place an SCSI-3 reservation on each source volume.

Correct Answer: C

---

### QUESTION 2

In the Oracle database environment, how can 3PAR Priority Optimization help to improve the application?

- A. Setting the IOPS increases the throughput of data per second, thus decreasing the completion time of databases queries.
- B. Setting the response time or latency improves transaction times in the database.
- C. Setting the bandwidth controls the IOPS, thus only applying to OLTP workloads.
- D. Setting the bandwidth reduces the wait time of the storage responding to the server request.

Correct Answer: A

---

### QUESTION 3

DRAG DROP

Arrange the host server writing process in a 3PAR asynchronous streaming onsite remote copy environment in the correct order.

Select and Place:

**Host Server Writing Process**

**Order**

- Acknowledgement is sent to the host resulting in low latency from the host to the system.
- Write cache pages are coalesced into tickets that describe IO order and are replicated to second system.
- Write IO is replayed in order on the secondary system to ensure consistency with the primary.
- Writing issued from the host server is stored in the local array's cache.

Correct Answer:

**Host Server Writing Process**

**Order**

- Write cache pages are coalesced into tickets that describe IO order and are replicated to second system.
- Writing issued from the host server is stored in the local array's cache.
- Acknowledgement is sent to the host resulting in low latency from the host to the system.
- Write IO is replayed in order on the secondary system to ensure consistency with the primary.

**QUESTION 4**

For which benefit should you recommend HPE 3PAR StoreServ 20450 over the 9450 model? (Select two.)

- A. higher performance (IOPS and bandwidth)
- B. better density of SSD drives in the base rack
- C. power and cooling efficiency
- D. higher per-node cache
- E. easier management

Correct Answer: BC

**QUESTION 5**

Which software component complements HPE RMC for added customer value with the integration with HPE RMC for

VMware (RMC-V) and is a tool that extends the functionality of a backup and replication feature (by allowing the administrator to view and recover an application item from within the application VM backup or replica)?

- A. Veeam Explorer
- B. HPE 3PAR Host Explorer
- C. HPE RMC Catalyst Host Agent
- D. Oracle RMAN

Correct Answer: A
