QUESTION 1

What are the network requirements for the HPE Ezmeral Container Platform controller and gateway?

- A. The controller and gateway must be on the same routable network as the Kubernetes or EPIC hosts.
- B. The controller and gateway must be on routable networks, but do not have to be on the same network as each other or other hosts.
- C. The controller and gateway must be on the same routable network as each other, but not necessarily other hosts.
- D. The controller and gateway must be on the same non-routable private network as each other and all other hosts.

Correct Answer: D

QUESTION 2

What is the purpose of the training stage in the ML lifecycle?

- A. The ML application applies a model to the data and tests the effectiveness of that model.
- B. The ML application gathers data and applies an algorithm to prepare the data for use.
- C. The ML algorithm assesses different datasets and selects the best data for use in later stages.
- D. The ML algorithm processes a dataset and learns to perform a task.

Correct Answer: B

QUESTION 3

What is one key advantage of HPE EzmeralData Fabric as opposed to HDFS?

- A. EzmeralData Fabric stores a great deal more metadata than HDFS, making it more resilient.
- B. EzmeralData Fabric uses more efficient erasure coding to protect all data, instead of replication.
- C. EzmeralData Fabric reduces load on storage nodes by placing all metadata on a centralized name node, while HDFS distributes metadata.
- D. EzmeralData Fabric enables admins to set policies at a logical volume level, while HDFS does not.

Correct Answer: D

QUESTION 4

You are creating an EPIC Tenant on Ezmeral Container Platform.

When would you grant the Cluster Superuser privilege to Tenant Admins?

- A. The Tenant Admins need rights to multiple tenants, and you do not want to give these users Site Admin rights.
- B. The Tenant Admins need additional rights to set up persistent storage for certain applications.
- C. The Tenant Admins need to access the App Store and download apps for the tenant.
- D. The Tenant Admins requires root access to run ActionScripts on virtual clusters.

Correct Answer: C

QUESTION 5

What is a setting that you are allowed to change after you deploy a Kubernetes cluster?

- A. The number of hosts assigned to a role
- B. The type (data fabric or non-data fabric)
- C. The pod network range
- D. The authentication settings

Correct Answer: A
