QUESTION 1

What are benefits of using HPE OneView along with 3rd Party integrations? (Choose two.)

- A. Extensive management of 3rd Party server and storage devices
- B. Faster application development
- C. Integrated management of 3rd Party software licenses
- D. Standardized templates to optimize industry standard applications
- E. Simplified infrastructure lifecycle operations

Correct Answer: AB

QUESTION 2

Identify the HPE OneView object you would use to accomplish each task.

Select and Place:

Answer Area

OBJECT

Enclosure Group

Logical Interconnect

Logical Interconnect Groups

Network Set

TASK

Quickly add/remove associated Ethernet networks across one or more server profiles

Define Virtual Connect configuration policy with uplinks, associated networks, QoS and advanced Ethernet settings

Active configuration of interconnect modules within a logical enclosure including uplinks, downlinks and stacking links

Common collection of settings and LIGs used across multiple enclosures

Correct Answer:

Answer Area

OBJECT

TASK

	Network Set	Quickly add/remove associated Ethernet networks across one or more server profiles
	Logical Interconnect Groups	Define Virtual Connect configuration policy with uplinks, associated networks, QoS and advanced Ethernet settings
	Logical Interconnect	Active configuration of interconnect modules within a logical enclosure including uplinks, downlinks and stacking links
	Enclosure Group	Common collection of settings and LIGs used across multiple enclosures

QUESTION 3

An administrator is creating a volume template in HPE OneView to manage storage volumes on an HPE 3PAR StoreServ storage system. In addition to the storage pool and capacity, which parameters in the template must the administrator specify? (Choose two.)

- A. provisioning type
- B. drive type
- C. sharing mode
- D. deduplication method
- E. storage type

Correct Answer: AC

QUESTION 4

You assign a server profile to an existing BL Gen 8 server within a managed enclosure with Affinity set to "Device Bay + Server Hardware". What would happen if you replace the server in the enclosure with a new BL Gen 10 server hardware resource?

- A. It will apply the profile if a server with the correct serial number installed.
- B. It will apply the profile if the correct server hardware type is installed.
- C. It will prevent the profile from being applied if a different server is inserted to that bay.
- D. It will prevent the profile if the server is configured with Secure Boot mode in the BIOS.

Correct Answer: D

**QUESTION 5**

After HPE BL460c Gen10 server failure, the system operator quickly replaces the failed server with a new one in the same bay. However, the server profile does not get applied automatically. What may have prevented the profile from being applied?

- A. The affinity value is set to "device bay + server hardware".
- B. The server profile attribute is set to "Occupied".
- C. The firmware "Force installation" option is selected.
- D. The Volume Template properties are locked.

Correct Answer: A
