QUESTION 1

Refer to the exhibit.

Create Volume General ?

General

Volume template	Hyper-V	X
Volume template description	not set	
Storage pool	<u>cgp-growth-limit-ITIB</u>	
Storage System	<u>ThreePAR-1</u>	

Volume Properties

Capacity	20.00 GiB
Sharing	<input checked="" type="radio"/> Private <input type="radio"/> Shared

Change Volume Template to "Hyper-V" **Create** Create + Cancel

An administrator is creating new volumes in preparation for a new Hyper-V cluster. On the Create Volume screen, the storage administrator notices that the capacity of the volume can't be edited. What is preventing the administrator from increasing the volume size?

- A. The capacity is a locked value in the volume template.
- B. The storage pool is out of capacity, so no additional storage can be allocated.
- C. The wrong storage system is selected.
- D. The administrator doesn't have permissions to create volumes.

Correct Answer: C

QUESTION 2

What are benefits of the RESTful API for HPE OneView? (Choose two.)

- A. REST is a heavyweight toolkit that can create and modify just about any type of resource.
- B. REST is an HPE invention built into HPE OneView and iLO that enables management of devices through the Red Fish standard.
- C. REST enables automating anything that can be done from the UI using a favorite scripting or programming language.
- D. REST enables developers and users to create their own apps, or provide integration with other applications.

Correct Answer: CD

QUESTION 3

Your customer added some Gen10 servers to an environment managed by HPE OneView. The position of the Gen10 servers in the intelligent racks is not automatically detected. What can cause this problem?

- A. Gen10 servers are mixed with Gen9 or Gen8 servers, which is not supported.
- B. Intelligent Rack is not properly licensed in HPE OneView.
- C. Location sensor is not enabled for Gen10 servers.
- D. Gen10 servers do not support Location Discovery Services.

Correct Answer: D
