### QUESTION 1

What unique identifier does HPE OneView use to interact with each resource individually?

- A. serial number
- B. MAC address
- C. URI
- D. WWN

Correct Answer: C

---

### QUESTION 2

An administrator needs to add multiple BladeSystem c7000 enclosures to a new instance of HPE OneView. The enclosures are currently being monitored by a different instance of HPE OneView. What must the administrator do before beginning importing the enclosure to the new HPE OneView appliance?

- A. Add Frame Link Module.
- B. Edit the Enclosure license to be HPE OneView Advanced.
- C. Add enclosure for management.
- D. Delete the enclosure from the current HPE OneView Appliance.

Correct Answer: A

---

### QUESTION 3

Identify the HPE OneView object you would use to accomplish each task.

Select and Place:

**Answer Area**

**OBJECT**

**TASK**

Enclosure Group		Quickly add/remove associated Ethernet networks across one or more server profiles
Logical Interconnect		Define Virtual Connect configuration policy with uplinks, associated networks, QoS and advanced Ethernet settings
Logical Interconnect Groups		Active configuration of interconnect modules within a logical enclosure including uplinks, downlinks and stacking links
Network Set		Common collection of settings and LIGs used across multiple enclosures

Correct Answer:

**Answer Area**

**OBJECT**

**TASK**

	Network Set	Quickly add/remove associated Ethernet networks across one or more server profiles
	Logical Interconnect Groups	Define Virtual Connect configuration policy with uplinks, associated networks, QoS and advanced Ethernet settings
	Logical Interconnect	Active configuration of interconnect modules within a logical enclosure including uplinks, downlinks and stacking links
	Enclosure Group	Common collection of settings and LIGs used across multiple enclosures

**QUESTION 4**

Where would you go in the HPE OneView Main Menu to access information about the environment status that can be exported to csv?

- A. Activity
- B. Dashboard
- C. Reports
- D. Data Centers

Correct Answer: C

**QUESTION 5**

Refer to the exhibit.

Authentication ▾ Headers ▾ View ▾ Favorites ▾ Data migration RESTClient

**[ - ] Request**

Method  URL

Headers

X-API-Version: 500  Content-Type: //application/json

Body

```
{"userName": "administrator", "password": "iloverest", "authDomain": "LOCAL"}
```

**[ - ] Response**

Headers Response Preview

```
1 {"errorSource":null,"nestedErrors":[],"errorCode":"GENERIC_HTTP_403","data":{},"recommendedActions":["Check the request URI, then resend the request."],"details":"You are allowed to access the requested resource.","message":"Forbidden"}
```

A server administrator using the REST API is troubleshooting the error seen in the exhibit. What needs to be fixed in the command?

- A. add the missing authentication token to the header
- B. change http to https in the URL
- C. change the "login-sessions" string in the URL to "login-session"
- D. change the POST method to PUT

Correct Answer: D
