QUESTION 1

DRAG DROP

Match the security features of HPE OneView with their use cases.

Select and Place:

Feature	Use Case	
Certificate based trust	Identity validation for management network transactions.	<input type="text"/>
Role based access control	Secure form of user authentication based on "what you know" and "what you have".	<input type="text"/>
Scope based access control	Restriction of user rights to a subset of resources within the infrastructure.	<input type="text"/>
Two-factor authentication	Restriction of user rights to perform actions (create, read, update, delete, or use) to specific resources within a category.	<input type="text"/>

Correct Answer:

Feature	Use Case	
<input type="text"/>	Identity validation for management network transactions.	Certificate based trust
<input type="text"/>	Secure form of user authentication based on "what you know" and "what you have".	Two-factor authentication
<input type="text"/>	Restriction of user rights to a subset of resources within the infrastructure.	Scope based access control
<input type="text"/>	Restriction of user rights to perform actions (create, read, update, delete, or use) to specific resources within a category.	Role based access control

QUESTION 2

DRAG DROP

Match the HPE management tools to their function.

Select and Place:

TOOL

FUNCTION

HPE SUT		Provides health status of multiple servers, profiles, and enclosures across multiple HPE OneView appliance environments
HPE OneView Global Dashboard		Provides HPE OneView management for a Synergy environment
Composer		Enables updates to be staged, scheduled, and installed without rebooting the system into Intelligent Provisioning
HPE iLO		Provides hardware management of and remote console to a server

Correct Answer:

TOOL

FUNCTION

HPE OneView Global Dashboard		Provides health status of multiple servers, profiles, and enclosures across multiple HPE OneView appliance environments
Composer		Provides HPE OneView management for a Synergy environment
HPE SUT		Enables updates to be staged, scheduled, and installed without rebooting the system into Intelligent Provisioning
HPE iLO		Provides hardware management of and remote console to a server

QUESTION 3
