QUESTION 1

You are administering an IntroSpect Installation. While monitoring the load on the IntroSpect Packet Processors, you think that one Packet Processor is overloaded. Is this a correct statement about the possible overload? (As a general rule, the data rate should be below 5000 event/sec.)

- A. Yes
- B. No

Correct Answer: A

QUESTION 2

You deploy IntroSpect Analyzer in your existing network. You want to monitor email for suspect malware activity. Would this action be supported by IntroSpect? (Deploy a supported DNP like Proofpoint Email Protection, and integrate with The IntroSpect Analyzer.)

- A. Yes
- B. No

Correct Answer: B

QUESTION 3

You are deploying a new IntroSpect Packet Processor in your data center. It is not communicating with the analyzer in the same data center. You think that you have entered the host name of the analyzer incorrectly while bootstrapping the packet processor. Would this be a logical next step? (Clear out the bootstrap data and restart the system. After the restart, rerun the bootstrap.)

- A. Yes
- B. No

Correct Answer: A

QUESTION 4

While looking in the IntroSpect Analyzer Conversations screen you see there are a large number of DNS sessions coming from one IP address on the data center network VLAN. Would this be a logical next step? (Add the IP address to the DNS Server under Configuration>System>in the analyzer so the Analyzer will ignore the DNS traffic from the IP address.)

- A. Yes
- B. No

Correct Answer: B

QUESTION 5

An admin is evaluating entity activity alerts for large internal downloads, excessive host access, accessing hosts with SSH, and host and port scans. Is this a correct reason for these types of alerts? (a malware seeking command and control.)

- A. Yes
- B. No

Correct Answer: B
