QUESTION 1

For which use case should you recommend an Aruba virtual gateway?

- A. Eliminating the need for branch gateway appliances by replacing them with virtual gateways that run on commodity hardware
- B. Managing branch gateways across multiple sites and providing the SD-WAN orchestration capabilities
- C. Integrating Aruba CX switches into a virtualized data center, such as one that uses VMware vSphere 3
- D. Connecting Aruba branch gateways to cloud applications through a virtual private cloud such as Amazon web Services (AWS)

Correct Answer: B

QUESTION 2

What should you tell customers about Aruba AIOps' advantages versus Mist?

- A. While Mist offers features for enhancing troubleshooting, it does not offer AI or remediation guidance.
- B. Aruba AIOps benefits from a much larger data set that ensures problems are more accurately identified, dynamic baselines cut down on alert fatigue, and recommendations are based on AI models, not basic monitoring analytics
- C. Mist AIOps capabilities derive from Juniper, and Mist and Juniper are not well integrated.
- D. Mist uses machine learning from large data sets for its AIOps solution, while Aruba AIOps uses a more powerful quantum computing approach that requires less data.

Correct Answer: A

QUESTION 3

You are proposing an Aruba Instant On solution to a customer who is also considering Meraki. Which key Aruba Instant On advantage should you point out?

- A. Instant On gives customers the power of AIOps, while Meraki solutions have limited intelligence.
- B. Instant On solutions can seamlessly grow into Aruba ESP solutions, while Meraki limits growth
- C. Instant On licenses lots of customers' license for specific features, while Meraki has an all-in-one license.
- D. Instant On provides more management options than Meraki, but at a lower TCO.

Correct Answer: B

QUESTION 4

You are proposing an Aruba controller-based solution for a customer.

Which customer need indicates that you should propose Aruba Mobility Master as part of the solution?

- A. the need to simplify the development of customer-facing mobile engagement apps
- B. the need to manage wired and wireless devices from one interface
- C. the need for machine-learning-based insights into network health and connectivity
- D. the need for always-on wireless connectivity with no downtime

Correct Answer: B

QUESTION 5

Which aspect of Aruba solutions does the Silver Peak acquisition enhance?

- A. IDS/IPS
- B. Ethernet and storage convergence
- C. Wireless AI Ops
- D. SD-WAN

Correct Answer: A
