QUESTION 1

You have proposed Aruba 8400 switches as core switches for a customer. The customer is very concerned about the network always being on and has indicated that no maintenance window is permitted even for a core switch software upgrade. What feature of this switch should you explain?

- A. Backplane stacking
- B. Network Analytics Engine (NAE)
- C. Virtual Switching Extension (VSX)
- D. ArubaOS-CX Python-based APIs

Correct Answer: C

QUESTION 2

What is an example of how customers can benefit from Aruba AI search

- A. IT can create more accurate device inventories using AI search's device profiling capabilities
- B. IT security teams can ensure consistent policies are applied to users no matter where they move on the network
- C. The tech support team can quickly locate the addos associated with a user who is experiencing a problem
- D. Developers can easily build location-based services that track user devices and provide personalized experiences

Correct Answer: A

QUESTION 3

You are proposing an Aruba wired and wireless solution to a customer. After a discussion about Aruba ClearPass and IntroSpect, a member of the security team asks about security measures that go beyond software solutions.

What is one advantage of Aruba Secure Infrastructure that you should emphasize to this technical influencer?

- A. Silicon root of trust creates a digital fingerprint in the silicon of ArubaOS switches to ensure they will never boot with compromised hardware.
- B. Connectivity Health collects and compiles information about switch configuration, protocol, and system state and uses machine learning to compare this information to baseline figures.
- C. An Aruba infrastructure reduces the likelihood traffic can be intercepted with centralized encryption and deep packet inspection.
- D. Aruba controlled APs maintain a distributed policy engine that defines who and what devices can connect to which data, infrastructure, and applications.

Correct Answer: C

QUESTION 4

What is one distinguishing feature of Aruba NetInsight and User-centric Service Assurance?

- A. They help improve customer engagement by providing a customizable Wi-Fi portal.
- B. They help to analyze customer usage patterns over a certain period of time so that companies can improve marketing campaign success.
- C. They help IT to simplify policy enforcement by enhancing visibility, authentication and authorization.
- D. They help deliver a better user experience with in-depth network analytics to assess user, device, and application connectivity.

Correct Answer: D

QUESTION 5

Which challenge does the increase of digital learning environments present to primary schools?

- A. Schools are not deploying enough wired and wireless IoT devices for the digital learning environments to succeed.
- B. Schools often have too large of an IT department, which can result in a network that is too mismanaged and siloed to meet performance requirements.
- C. Schools lack the budget to obtain a reliable wired and wireless network that can handle the increase in devices and connectivity needs.
- D. Schools have focused primarily on cloud solutions for the past decade, so switching back to an onprem infrastructure seems daunting.

Correct Answer: C
